

NORTHBAY MEDICAL CENTER CARDIOVASCULAR OPERATING ROOM

FAIRFIELD, CA

DELIVERY METHOD | Design Build

COMPLETION DATE | 2009 March

A 2,225-square-foot remodel that combined two operating rooms into one state-of-the-art hybrid operating room. Performed multi-phased project with uninterrupted service to the other ORs. Included integrated cardiovascular monitoring, lighting, sound, and video systems. Electrical work included power, conduit, and connection for HVAC units to energy management system; conduits and raceway for data connections; and code blue and staff assist to tie in to local system. Upgraded HVAC system to provided adequate cooling for suite. Mechanical upgrades included new plumbing, pipe fixtures, relocation of med gas and fire sprinkler heads as required for new OR suite layout. Upgraded aging wood structure, framing, and doors for desired department layout. Remodeled both men's & women's locker rooms. Remodeled restrooms for ADA compliance. Added new lighting, casework, and finishes.

HIGHLIGHTS

- In 2009, delivered the first open heart surgery in Solano County, establishing Northbay's Heart & Vascular Center and bringing advanced cardiac treatment to Solano County residents. As of 2011, this center is the first Level III Trauma Center in Solano County.

THE CLIENT SAID...

Our first open heart surgery case was a success and everyone loves the new OR! Thanks, all, for a great job!
